EDUCATION

Symbiosis Institute of Technology

B.Tech in Artificial Intelligence & Machine Learning

- **CGPA:** 8.04
- **Relevant Coursework:** Machine Learning, Deep Learning, NLP, Computer Vision, LLMs & Agents, Data Structures & Algorithms, DBMS, OS, Computer Networks, Probability & Statistics

Pune, Maharashtra

2024 – 2028

EXPERIENCE

Research and Project Intern

Symbiosis Centre for Applied Artificial Intelligence (SCAAI)

- Built end-to-end ML pipelines on an NDA-restricted laboratory dataset, spanning a modular data-cleaning system, feature engineering, multi-output model training/validation, and deployment as part of collaborative applied research.
- Developed and optimized regression and classification models for real-world scientific data through systematic experimentation, evaluation, and reproducible pipelines built in Python.

July 2025 – Present

Pune, India

PROJECTS

LegalAI | *FastAPI, LangGraph, Memgraph, PostgreSQL, Redis, RAG, vLLM, Docker, AWS EC2*

GitHub | Live Demo

- Architected a full-stack legal contract analysis platform with a CPU-only NLP/CV extraction pipeline, a Memgraph knowledge graph, and hybrid RAG (dense + sparse retrieval fused via Reciprocal Rank Fusion) for clause simplification, risk detection, and timeline extraction.
- Orchestrated a multi-agent LangGraph pipeline with a citation and knowledge-graph verifier to ground every generated answer in source clauses, migrating inference from a managed LLM API to self-hosted generation (vLLM, Qwen3) for on-prem/air-gapped deployment.
- Achieved 91% risk detection accuracy and improved average legal document comprehension from 3.1 to 4.3/5 across 30 users, backed by a PostgreSQL/Redis data layer and a provider-abstraction interface enforced via CI import-linter contracts.

ImpulseLock | *Java, Spring Boot, Spring Security, React.js, MySQL, Docker*

GitHub | Live Demo

- Developed a full-stack financial transaction risk evaluation platform using Java, Spring Boot, React.js, and MySQL, implementing a modular Strategy Pattern rule engine to classify transactions as **ALLOW**, **DELAY**, or **BLOCK** against configurable, user-defined risk policies.
- Architected a secure, scalable backend with Spring Security, JWT-based RBAC, JPA/Hibernate, and a layered architecture, automating testing and deployment with Docker, GitHub Actions CI/CD, Swagger/OpenAPI, and JUnit/Mockito.

Autonomous Reconciliation Agent | *Python, LLM Agents, RAG, NLP*

GitHub

- Built an autonomous finance agent for the Razorpay AI Buildathon 2026 (AI Finance Controller track) that matches multi-source transaction records and auto-resolves ambiguous mismatches through LLM-driven reasoning.
- Grounded exception handling in a RAG pipeline over policy and tax-rule documents (GST/RBI/NPCI sources), with full audit logging for every automated reconciliation decision to ensure traceability and compliance.

TalentMatch AI | *Python, TensorFlow, Scikit-Learn, Pandas, Streamlit*

GitHub

- Built an end-to-end AI recruitment platform to rank candidates, predict job fit, and identify skill gaps through an interactive Streamlit dashboard, using a custom composite fit-score formula and an F1-calibrated decision threshold.
- Engineered 13 candidate-job matching features and trained an ANN on 10K synthetic candidate-job pairs, achieving 85% accuracy and 0.895 ROC-AUC.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, JavaScript

AI/ML: TensorFlow, PyTorch, Scikit-Learn, Hugging Face, LangGraph, RAG, vLLM, OpenCV

Backend & Frameworks: FastAPI, Spring Boot, Spring Security, Flask, Streamlit, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis, Memgraph, SQLite

DevOps & Cloud: Docker, AWS (EC2), Git, GitHub Actions CI/CD, Linux

Tools: Postman, Swagger/OpenAPI, Power BI, Excel

CERTIFICATIONS

Machine Learning Specialization

Andrew Ng – DeepLearning.AI

Deep Learning Specialization

Andrew Ng – DeepLearning.AI

Complete Data Science, DL, NLP, MLOps Bootcamp

Krish Naik – Udemy

LEADERSHIP & ACTIVITIES

- Technical Team Executive – AI Club | Technical Team Member – Codex Club & FOSS Club
- 3rd rank, district-level chess (1800 ELO); represented city in district-level cricket tournaments
